## **Homework 1**

## **Maths Introduction**

## Some modular arithmetic

1. Working with the following set of Integers  $S = \{0,1,2,3,4,5,6\}$ 

What is

- a) 4 + 4
- b) 3 x 5
- c) what is the inverse of 3?
- 2. For  $S = \{0,1,2,3,4,5,6\}$

Can we consider 'S' and the operation '+' to be a group?

- 3. What is
  - -13 mod 5?
- 4. Polynomials

For the polynomial  $x^3 - x^2 + 4x - 12$ 

Find a the positive root?

What is the degree of this polynomial?

## **Use cases**

In your teams discuss any systems you have used that involved zero knowledge proofs. Have you seen any applications of zero knowledge proofs other than with a blockchain? What is to you, the most important feature of zkp technology?

Think of some use cases of zero knowledge proofs that you would like to see developed.
